### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Currently Amended) A method for making an aqueous fabric softening composition having pH from about 2 to about 8 with improved delivery of perfume raw material, said method perfume polymeric particle comprising preparing a perfume polymeric particle by mixing:

- a) a ~~non-eneapsulated~~ polymeric particle comprising a monomer which is in its protonated cationic form in aqueous media at a pH within the range of about 2 to about 8 having the formula:

wherein each of R<sup>1</sup>, R<sup>2</sup> and R<sup>3</sup> are independently selected from hydrogen or C<sub>1</sub> to C<sub>6</sub> alkyl; T is a carboxylic moiety; Z is -(CH<sub>2</sub>)-; z is 2; A is NR<sup>6</sup>R<sup>7</sup> wherein R<sup>6</sup> and R<sup>7</sup> are independently selected from H, C<sub>1</sub>-C<sub>8</sub> linear or branched alkyl, or alkyleneoxy having the formula:

wherein R<sup>9</sup> is C<sub>2</sub>-C<sub>4</sub> linear or branched alkylene, carbonyl alkyl, or mixtures thereof; R<sup>10</sup> is hydrogen, C<sub>1</sub>-C<sub>4</sub> alkyl carbonyl alkyl, or mixtures thereof; y is an integer from 1 to 10; and

- b) a perfume comprising a perfume raw material having a Kovats Index value of from about 1000 to about 1400 and optionally one or more of the following characteristics:
- a molecular weight of less than about 200;
  - a boiling point of less than about 250°C; or
  - a ClogP of less than about 3;

Customer No. 27752

wherein the polymeric particle has a net cationic charge at a pH from about 2 to about 8 from about 20mV to about 80mV, a particle size in the range from about 100 nanometers to about 50 micrometers and a Response Factor (RF) of the perfume polymeric material is at least about 1.5, as measured by Longevity Test Protocols I or II, said perfume being non-encapsulated by and non-polymerically associated with the polymer, and

c) adding said perfume polymeric particles to a product matrix comprising a fabric softening agent.

2. (Cancelled)

3. (Currently Amended) The method perfume-polymeric-particle according to Claim 1 wherein the cationic monomer of said polymer is dimethylaminoethyl methacrylate.

4. (Cancelled).

5. (Currently Amended) The method perfume-polymeric-particle according to Claim 1 wherein the polymeric particle which further comprises a non-cationic monomer.

6. (Currently Amended) The method perfume-polymeric-particle according to Claim 5 wherein the non-cationic monomer is selected from the group consisting of: methyl methacrylate, methyl acrylate, ethyl acrylate, n-propyl acrylate, iso-propyl acrylate, n-butyl acrylate, isobutyl acrylate, hydroxyethyl acrylate, hydroxypropyl acrylate, benzyl acrylate, ethylhexyl acrylate, n-propyl methacrylate, ethyl methacrylate, iso-propyl methacrylate, isobutyl methacrylate, n-butyl methacrylate, methacrylic acid, acrylic acid, acrylamide, methacrylamide, styrene,  $\alpha$ -methyl styrene, hydroxyethyl methacrylate, hydroxypropyl methacrylate, hydroxybutyl acrylate, hydroxybutyl methacrylate, PEG acrylate, phenyl methacrylamide, t-butyl methacrylamide, p-hydroxyphenyl methacrylamide, vinyl ethers, vinyl ketones, vinyl acetates, vinyl phenols, acylamido-2-methylpropanesulfonic acid, vinylsulfonate, vinylpropionate, methylallylsulfonic acid, N-vinyl formamide and N-vinylpyrrolidone, and mixtures thereof.

7. (Currently Amended) The method ~~perfume-polymeric-particle~~ according to Claim 1 wherein the perfume polymeric particle has an average particle size of from about 1  $\mu\text{m}$  to about 39  $\mu\text{m}$ .

8. (Currently Amended) The method ~~perfume-polymeric-particle~~ according to Claim 1 wherein the perfume polymeric particle has an average particle size of from about 200 nm to about 900 nm.

9. (Currently Amended) The method ~~perfume-polymeric-particle~~ according to Claim 1 wherein the polymer is a water-insoluble polymer.

10. (Currently Amended) The method ~~perfume-polymeric-particle~~ according to Claim 1 wherein the perfume raw material comprises at least about 10% by weight of the perfume.

11 - 34. (Cancelled)
